Skills

- Assertiveness
- Teamwork
- Analytical and research skills
- Fast learning
- Adaptability

Profile

As a UX/UI designer, I am passionate about designing user-centric platforms that address real needs intuitively. I possess solid programming knowledge in JavaScript, React, HTML, CSS, Bootstrap, and SQL databases. My experience has been solidified through participation in various courses and projects, where I have contributed to the design and development of minimum viable web products connected to databases, applying agile methodologies and design thinking. My current goal is to expand my skills in UX/UI, 2D, and 3D design, as well as programming, to bring a collaborative approach and innovative mindset to the team and the company.

Experience

Junior Software Engineer (September 2023 – May 2024) - EPAM

- Frontend Developer role focused on JavaScript, ReactJS, CSS, and various React libraries.
- Responsible for connecting endpoints and troubleshooting application bugs.
- Utilized Agile methodologies such as SCRUM, actively participating in daily stand-ups, sprint plannings, and demos.
- Collaborated with cross-functional teams to deliver high-quality software solutions.
- Demonstrated adaptability and problem-solving skills in a fast-paced development environment.

Projects

Carpooling App (November 2023)

- Conducted user experience research to understand the transportation needs of Colombian citizens.
- Developed user personas to gain deeper insights into citizens' needs, expectations, pain points, and objectives that needed to be addressed with a transportation application.
- Designed the application using Figma, from wireframing to high-fidelity prototypes, and defined the interactions screens should have.

Lithium (April – July 2023)

- Developed a web application using Java, JavaScript, Spring Boot, HTML, CSS, and SQL database.
- Enforced essential functions, such us profile creation, login, and data update, to offer a complete user experience.
- Contributed actively to the development of an online purchasing system, focused on the user efficiency and comfort.
- Planed and designed thoroughly the website using Figma, ensuring an attractive and high-quality design.

Education

May 2024	UX/UI Designer Todos a la U
July 2023	Java Full Stack Developer – Bootcamp Generation Colombia
September 2018	Geologist Universidad Nacional de Colombia

Curses

December 2022	Web Development with Python U-COLTIS
December 2022	Programming Skills with emphasis in Web Development MinTIC – Universidad Tecnológica de Pereira
